

CAREER OBJECTIVES

- Looking for Oracle Database Administrator position in a challenging IT career and to be part of a progressive and growth-oriented organization that gives me scope to enhance my knowledge and skills to scope up with the latest technological changes.

PROFESSIONAL SUMMARY

- Have 4 years of experience as an Oracle DBA, RAC, ASM, Data guard on 11g, 12C & 19c environment on various platforms, and overall 7 years of experience.
- Experience in Installing & Configuring 11g, 12c & 19c Real Application Cluster (RAC) databases on Linux boxes using ASM for High Availability.
- Installation and Configuration, creation and deletion of Oracle homes.
- Well versed with utilities like SRVCTL, CRSCTL, OCRCHECK, OCRCONFIG, asmcmd, oracle ASM, to manage RAC instances.
- Upgraded Databases from 12c to 19c.
- Well versed with utilities like ODG and datapump for Large Database Migrations (more than 1TB).
- Migration done with standalone database to RAC database conversion.
- Monitoring day-to-day activities such as OS space check, Tablespace check, alert log monitoring and performance issues.
- Performed Database Refresh/Cloning from production using RMAN.
- Taking database Cold Backups, Hot backups, RMAN Backup and Logical Backup using Export and Import utility.
- Implemented & managing Oracle physical standby database for disaster recovery & business continuity.
- Extensive knowledge on database administration for Oracle 11g,12C & 19c
- Good experience in Oracle Software Installations by using Graphical method.
- Experience in Oracle Database Creation through DBCA and Manual method.
- Creation of database users and by setting default table spaces and temporary table spaces, assigning quotas, roles, privileges and profiles to users.
- Experience in Schema refresh using Exports/Imports and Data pump.
- Wide range of experience in RMAN backup / recovery scenarios.
- Having experience in Cloning of a database using Cold, Hot and RMAN.
- Having Good experience in applying Patches to the database.
- Identifying fragmented Indexes and Rebuilding Indexes.
- Taking backup of OCR and VOTING DISK.

- Administrating RAC databases using SRVCTL and CRSCTL.
- Monitoring alert log and trace files for errors.
- Monitoring jobs and setting schedules in Crontab

KEY SKILLS

RMAN	Patching	Upgradation
Cloning	Exports & Imports	Datapump
Data Guard	Performance Tuning	RAC

PROFESSIONAL EXPERIENCE

- Worked as an Oracle Database Administrator in CAPGEMINI from Nov 2021 to Apr 2025.

EDUCATIONAL SUMMARY

- MBA from Jawaharlal Nehru Technological University Anantapur in 2017
- BCOM Computers from S V University in 2015

TECHNICAL SKILLS

- Oracle RDBMS : 11G/12C & 19c
- High Availability & DR: : 11G/12C & 19c RAC, DATAGUARD
- Oracle Utilities : RMAN, exp/imp, Datapump, OEM, OPATCH
- Cluster Tools : SRVCTL, CRSCTL, OCRCONFIG
- Performance Tools : Explain Plan, SQL Trace, AWR, ASSH, ADDM
- Operating systems : OEL, Red Hat Linux, Windows, Solaris and AIX

PROJECTS AND RESPONSIBILITIES

Project#1:

Project Experience in COGNIZANT TECHNOLOGY SOLUTIONS PVT LTD

Client : PEPSICO
 Position : Oracle DBA
 Environment : Oracle 11g, 12c, 19c
 Duration : Dec 2017 – Nov 2021

Responsibilities:

- Creating Tablespaces and monitoring their growth and Resize or add Datafiles to Tablespaces.
- Creation of Database users and by setting the default table spaces, Assigning

quotas, roles, privileges and profiles to users.

- Regular monitoring of Alert log file on day-to-day basis.
- Creation of new db links and materialized views.
- Trouble shooting mounts point utilization issue and implementing new script to resolve the issue permanently.
- Clearing the mount point spaces if reaches greater than 90%.
- Upgrading the database from 11g,12c & 19c.
- Cloning the database.
- Implementation of Backup and Recovery Strategies using RMAN.
- Rebuilding the indexes to improve the performance.
- Gathering statistics on schema and schema objects.
- Maintaining physical standby database.

Project#2:

Project Experience in CAPGEMINI

Payroll	:	Artech Infosystems pvt ltd.
Client	:	Bayer
Position	:	Oracle DBA
Duration	:	Nov 2021- Apr 2025.
Environment	:	Oracle 11g, 12c, 19c

Responsibilities:

- Creating Tablespaces and monitoring their growth and Resize or add Datafiles to Tablespaces.
- Creation of Database users and by setting the default table spaces, Assigning quotas, roles, privileges and profiles to users.
- Regular monitoring of Alert log file on day-to-day basis.
- Creation of new db links and materialized views.
- Trouble shooting mounts point utilization issue and implementing new script to resolve the issue permanently.
- Clearing the mount point spaces if reaches greater than 90%.
- Upgrading the database from 11g,12c & 19c.
- Cloning the database.
- Implementation of Backup and Recovery Strategies using RMAN.
- Rebuilding the indexes to improve the performance.
- Gathering statistics on schema and schema objects.
- Maintaining physical standby database.
